# SILC S/AR FINISHING TABLE & S/MG1

The S/AR professional ironing table has been specifically designed for the fast ironing of personal garments in small to medium commercial applications. Producing high quality results with the minimum of time and effort. The built-in vacuum holds garments to the table and removes excess moisture, producing sharper creases and a superior ironing finish. Easy operation and minimal training ensures that ironing time is halved compared to household irons and ironing tables. Mounted on castors the unit can be easily moved where space is at a premium. Simple installation, 13 amp single phase electric supply

Features	Benefit to Customer
High build quality with stove enamelled cabinet	Cleanliness and long life with robust reliable performance, built for commercial use day-in/day-out
Heated ironing board	Removes residual moisture
Built-in vacuum	Cools garments for sharper creases and holds garments to table for better finishing
Easy to operate	Professional finishing results with the minimum of staff training
Commercial steam iron with micro-switch steam control	Constant supply of steam for professional quality finish
Mounted on castors	Unit easily moved for maximum flexibility
Simple plug in to 13amp socket	No installation costs
